## WORK EXPERIENCE

### OnlineJobs.ph

*Full-Stack Developer | January 2020 - Present*

- Rewrote the mobile app in native Swift and Kotlin, contributing to a significant increase in monthly active users.
- Develop and maintain native iOS and Android apps using SwiftUI, Swift, Jetpack Compose, and Kotlin.
- Build and maintain features across mobile apps, backend integrations, APIs, and release workflows.
- Maintain the codebase, release production builds, fix bugs, and implement new features.
- Collaborate directly with the CEO, CTO, design, support, and web development teams.
- Publish release builds to the App Store and Google Play.
- Implemented CI/CD workflows using GitHub Actions.

### Freelance / Contract / Part-time

*Full-Stack / Mobile Developer | November 2016 - Present*

- Built the alpha version of VoxPopin, an iOS app written in Swift.
- Rewrote Startender in native Swift for its beta release.
- Developed TurnApp, an iOS app for a Germany-based client.
- Developed Qcard, an Android app for a Canada-based client.
- Developed Vesado, an iOS app for a Florida-based client.
- Delivered several additional mobile projects under NDA.

### Alpha One Design

*Senior Mobile Developer, iOS & Android | March 2018 - May 2019*

- Developed an IoT mobile app for both iOS and Android.
- Built the apps in Swift and Kotlin, including RTSP protocol integration.

## ADDITIONAL EXPERIENCE

### **Startechup Inc.**

*Senior Mobile Developer & Team Lead, iOS & Android | January 2016 - November 2016*

- Managed and led the mobile development team while contributing to coding, bug fixes, and feature implementation.
- Facilitated Scrum meetings and coordinated directly with clients.
- Participated in recruitment, trained junior developers, and guided coding best practices and engineering standards.
- Collaborated with international clients including Somfy, Key4Events, ActivityLab, HungryUp, and GeeksOnABeach.

### **Indiefalcon Limited**

*Lead Android Developer | October 2015 - December 2015*

- Developed the Imaan Plus Android app.

### **Bridge Technology Partners Inc.**

*Software Engineer, Android | October 2014 - December 2014*

- Developed Memory Mark using Test-Driven Development.

### **RipeConcepts Inc.**

*Android Developer | May 2014 - October 2014*

- Developed SportXast, an Android app for a New Mexico-based client.
- Wrote unit tests using JUnit 3 and worked with early Android Studio beta tooling.

### **iRender Animation Inc.**

*Android Developer | November 2011 - April 2014*

- Contributed to several English-learning Android apps for clients in South Korea and China using Eclipse IDE and the Android SDK.
- Developed an in-house Android inventory app with a PHP REST API and MySQL database.
- Used Subversion for early projects and migrated to Git around mid-2012.
- Wrote supporting Python scripts and developed small game projects using Lua and Corona SDK.

### **Opinionology Inc.**

*PHP Developer | March 2011 - May 2011*

- Created web surveys using proprietary software built with PHP, HTML, JavaScript, and SQL.
